**Hot Melt
Technologies, Inc.**
No One Puts It Together Like HMT®

AutoPack® System Built for Uptime

**Less Maintenance. More Production.
Greater Reliability.**

When your packaging line is running, every minute counts. AutoPack is engineered to keep production moving with dependable performance and simplified maintenance.

 **MADE IN
THE USA**

Keep Production Moving

AutoPack hot melt systems are designed to help manufacturers maximize productivity by reducing common causes of downtime.

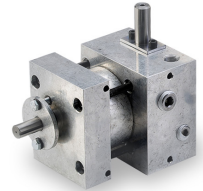

Heated Hoses

Lengths from 4' to 30' feet

Pumps

Positive displacement steel gear pump technology with pulse-free adhesive delivery

800 and 900 Series Automatic Guns

Designed for packaging and converting operations

Patented Modular Melt Tank

Quick-change for easy cleaning and servicing

Electric Pump Drive Motor

AC Constant or Variable Speed for dependable performance and minimal maintenance.
No compressed air required

Engineered for Long-Term Value

Suitable for a wide range of packaging applications, AutoPack design focuses on lowering the total cost of ownership. Fewer replacement parts, stable adhesive flow with accurate bead placement are some of the benefits backed by HMT expertise and support.

UL AND CSA COMPLIANT

ISO 9000 CERTIFIED
